

## COMMUNITY RELATIONS

The board shall cooperate with all news media in getting the pertinent facts concerning the schools before the public. The superintendent shall establish a basic and reliable source to which the news media may turn for information regarding our division schools. All information other than that which is of a confidential and/or personal nature, or which might have been discussed in any executive meeting of the board, shall be made available to the news media at the discretion of the superintendent.

The board encourages the attendance of the news media at all open board meetings.

The board, however, shall permit the interviewing of students and teachers during the school day only when such interviews do not, in the judgment of the principal or superintendent, disrupt the educational program or tend to cause undue confusion.

Adopted by School Board: June 19, 1973
